Project number 561633-EPP-1-2015-1-AM-EPPKA2-CBHE-JP (2015-2018)

Library Network Support Services (LNSS): modernising libraries in Armenia, Moldova and Belarus through library staff development and reforming library services LNSS Armenia, Moldova and Belarus

FINAL CONFERENCE OCTOBER 4, 2018

INNOVATIVE SERVICES DEVELOPED IN THE LNSS PROJECT

Elena **HARCONITA**, Alecu Russo Bălţi State University, Moldova

FROM THE SPECIFIC OBJECTIVES OF THE LNSS PROJECT

- The importance of information services is mentioned in several legislative and regulatory documents, including the Education Code (2014), the Science and Innovation Code (2004), the Law on Libraries (2017), and others.
- The library facilitates access to its services to all categories of users, without discrimination of any kind as to race, colour, sex, language, religion, nationality, ethnic origin, disability, opinion, political affiliation or any other similar criterion. Libraries offer special services to People with Special Needs.
- The library ensures in its activity the observance of the personal data regime.
- Library services continuously are improving, diversifying and updating, being linked to social, economic, technological and to the categories library users and their needs. (Regulation on services provided by libraries in the Republic of Moldova.)

From a traditional perspective, the decisive success factors of a library are as follows: its physical funds, the number of employees, the size of the building, the number of users in library halls etc. From a modern perspective though, a library's work can be regarded through a very user-oriented attitude. Then the above-mentioned criteria do not represent an evaluation/assessment framework by which the value of the academic (university) library could be appreciated", says Prof. Dr. Wolfram Neubauer, director of the university library in Switzerland.

Specialists in the Librarianship domain distinguish three levels of service structure in libraries:

First level

personal assistance provided to users by librarians.

The second level

requires librarians to create the environment in which users would help themselves.

The third level

is the support that librarians provide to users through technology resource management to create an accessible, useful and user-friendly environment.

RESEARCHER'S NIGHT

ACADEMIA DE ADMINISTRARE PUBLICĂ LA NOAPTEA CERCETĂTORILOR EUROPENI

Pe 23 septembrie curent, Academia de Administrare Publică, în calitate de membru de profil al Academiei de Stiinte a Moldovei, a participat cu o expoziție de realizări la cea de-a treia ediție a Nopții Cercetătorilor Europeni, eveniment de anvergură de promovare a științei în societate, organizat de către Academia de Stiințe și desfășurat în scuarul instituției.

Vizitând expoziția, vernisată de reprezentanții instituției noastre de învățământ superior, rectorul Academiei de Administrare Publică, dl Oleg Balan, doctor habilitat, profesor universitar, a menționat importanța acesteia pentru promovarea imaginii instituției noastre, dar și a științei în ansamblu, mai ales în rândul tinerilor. În opinia sa, expoziția din acest an este consistentă și demonstrează un nivel înalt de pregătire profesională a cadrelor didactico-stiințifice, precum și al cercetărilor efectuate la Academie.

riciana expecipa, reminara de representanti montajor mastico de misajament dapenor, restorar riciadamen de mantinuaria e donca, ar eneg balan, aceta habilitat, profesor universitar, a mentionat importanța acesteia pentru promovarea imaginii instituției noastre, dar și a științei în ansamblu, mai ales în rândul tinerilor. În opinia sa, expoziția din acest an este consistentă și demonstrează un nivel înaît de pregătire profesională a cadrelor didactico-stintifice, precum si al cercetărilor efectuate la Academie.

Silvia Dulschi, doctor, conferențiar universitar, sef Direcție stință și doctorat, a precizat că expoziția Academiei conține un număr impunător de lucrări științifice, cărți, reviste și alte materiale ce demonstrează realizările științifico-didactice ale savanților și ale colaboratorilor În domeniul administrării publice din ultimii ani, Astfel, pe parcursul anului trecut de studii au apărut 187 de publicații științifice și didactice, Actualmente, în cadrul Academiei se implementează 5 proiecte stiintifice de anvergură în cooperare cu instituții de învățământ și alti parteneri din tară și de peste hotare

Numeroși vizitatori, interesați de realizările și noutățile științei În domeniu, au luat cunoștință de conținutul expoziției Academiei, au avut prilejul să Întreţină tin dialog vive avendonanii al angundătorii neamati în avendomant

NATIONAL BIBLIOMETRIC INSTRUMENT

- Presenting (face-to-face and online) of ISI rated journals in available databases and periodicals collection, especially from the Journal Donation Project collection (New York, USA);
- Assisting students and researchers in the process of writing a research paper and publication (citation standards and writing bibliographic references, reference styles, etc.); http://tinread.usarb.md:8888/tinread/fulltext/bsu/reguli_referinte.pdf
- Use of bibliographic reference management software: EndNote,
 Mendeley, Zotero (adding, organizing, citing references);
- Communication of information, ethics of information use, methods of avoiding plagiarism.
- The elaboration electronic learning resources on-demand (site, blog, database, electronic archives, digital libraries);
- Mobile telephone services. Librarians appeal to innovations to reach users effectively.

INNOVATIVE SERVICES

Libraries' information delivery systems help librarians meet with users where they are: interactive utility services, including social networking services, blogs, wiki, etc.

- Printing documents
- Scanning documents / images and sending them on external memory or by e-mail
- Recording information on external memory support provided by the library
- Library filming of private events or other situations of using the library space as a commercial recording platform or for other purposes not related to library activity
- Editorial services (collection, editing, layout, etc.) according to the contract
- Text recognition operations through Optical Character Recognition (OCR)

After all the services one can judge how the librarian's role has changed in this informational-educational environment. Users appreciate the services and products that depend on the professionalism of librarians, their knowledge, their active position in the organization and promotion of services and products. The success of the innovations in organizing the library's information activities depends on the staff who, together with the information itself, is the most important strategic resource.

Summarizing the above, one can argue that today the Libraries in Moldova, participating in the LNSS Project have the right to position themselves as modern information centers, using well-defined integrated systems - ALEPH and COHA, develops online services, works with local and remote resources, offers a wide range of services based on Open Information Access, which allows and keeps constant feedback to users.

The participation of libraries in Projects, opens up new pages to the progress of moldavien university libraries, to developing partnerships, strengthening their potential, the tendency to transform to the rhythm of time, and to remain as useful as possible in the academic space and beyond.

The implementation of the LNSS Project has brought an influx of new ideas, knowledge, experiences, good practices, mobility, additional funding. The equipped library, however, certainly conveys the idea of quality, innovation, value current and in time of the study.
